

For Immediate Release

SafeSourcing Releases New Software to Help Companies Manage Spend.

SafeSpend Analysis™ offers a new way for companies to manage spend through technology.

Scottsdale, AZ – October 1, 2013 – Today SafeSourcing, a leader in eProcurement, announced the release of their latest SaaS delivered, cloud-based tool, SafeSpend Analysis™. The tool features capabilities that are user friendly and available for companies to implement into their current processes by taking company purchasing patterns and trends to new levels as it integrates external data feeds.. With this new technology, companies can manage and take control of their spend more easily and accurately, helping to identify and reduce costs across the board.
