SafeSourcing Announces the Release of a New White Paper by CEO, Ronald D. Southard

SafeSourcing, Inc. will be releasing a new white paper for the procurement industry.

Mason, OH – November 28, 2023 – SafeSourcing, Inc., a leading eProcurement company offering a complete Procure to Pay suite of applications supported by their White Glove Seven Step (7) managed services program, has announced they will be releasing a new white paper titled *Successfully Sourcing Categories!*

In this new white paper titled *Successfully Sourcing Categories*, CEO Ronald Southard dives into the details as to what it takes to run successful sourcing events and shows the results that can be achieved when the legwork and required research are completed properly.

This white paper is among many that Ron Southard, an industry leading procurement expert, has published over the years. The white papers aim to educate those in the procurement field on the nuanced details of what the procurement space has to offer when approached correctly. The white paper will serve as a guide and a tool for those in the industry on what steps can be made to achieve more success in their own sourcing efforts and to demonstrate the overwhelming value of a procurement partner such as SafeSourcing into any organizations sourcing environment. Other titles can be found at this link to the [SafeSourcing Website](#).

The white paper will be available to industry professionals and the public via the SafeSourcing website, www.safesourcing.com and LinkedIn.

SafeSourcing, Inc. provides cost effective tools under the SafeSourceIt™ product family that allows companies to dramatically reduce cost of goods, capital spending, and expenses in a timely manner while also reinforcing environmental and product safety programs. Focus is placed on a company's entire spend for all products and services. SafeSourcing's early stage client engagement is specifically focused on cost reduction through the use of a detailed seven step, white glove process using the SafeSourceIt™ e-RFX application suite.
