

SafeSourcing® eProcurement Tools

A one-stop shopping center

In today's world, sourcing and procuring the best product or service for the job has never been more challenging. Connecting with reliable suppliers is no easy task. Recent safety scares – ranging from pet food to tainted toys – have made it difficult to obtain the peace of mind that you and your customers expect. What's more, the universal demand to "go green" has skyrocketed in importance to individuals and businesses, and has created its own unique requirements and opportunities.

Accomplishing all of these important objectives at a price that's right seems complicated, if not impossible. Combine that with increased time constraints and a workforce functioning with limited awareness of additional sources of supply and you have a global procurement climate that can produce more than a few headaches, day in and day out.

Just in time, an innovative alternative has arrived. **SafeSourcing** is loaded with efficient and comprehensive tools and programs that turn the procurement process into a highly productive endeavor. SafeSourcing is, literally, a one-stop shopping center.

Our clients have access to:

- A Reverse Auction Tool, which can be used for all your procurement needs including new contract purchases, spot buys, replenishment, aggregation and collaboration with other buying organizations.
- SafeSourcelt™, A North American 240,000 Supplier Database which is specifically designed for ease-of-use. This unique database includes safety and eco controls and is the largest of its kind in North America.

Our SafeSourcing web site features:

- Safety in Sourcing, a blog with daily updates and comments from your peers
- Sourcing WIKI, which includes hundreds of procurement terms and definitions
- Sourcebook, a first-of-its-kind professional social network for procurement professionals
- Daily Safety Alerts from the USDA, FDA, ISO, and other standards-creating agencies

Keep the constant demands of your job at a minimum with our help. The bulk of our highly developed resources are FREE, including the web site, blog, daily safety alerts, and Sourcebook. SafeSourcing's additional tools are user-friendly and extremely cost competitive.

Simplicity, savings, and security ... let SafeSourcing help you deliver the goods.
