

## SafeSourcelt™

**The largest retail specific supplier database in North America**

In order to achieve maximum savings when using an e-procurement event, you need numerous suppliers aggressively vying for your business. Not just those old standbys that have been around for years, but some newer players, many of whom you haven't even heard of yet. Over the course of a work week, the amount of time devoted to researching new suppliers would be daunting.

The great news is that help is here. Now there is **SafeSourcelt**, an innovative supplier database that boasts over 240,000 North American suppliers of everything from soup to nuts. Searchable by region, state, province, zip code, and proximity to a specific location, etc., SafeSourcelt takes an exhaustive look at each individual supplier, so you don't have to.

Using a vigorous screening process that involves at least twenty-five specific safety certifications, SafeSourcelt weeds out the "undesirables," which lets you get right to the business of buying. And, SafeSourcelt will review a supplier's eco-standards practices, giving you the assurance that you are doing all that you can to "go green."

No longer do you have to worry about whether or not your potential suppliers maintain high standards of quality. From not-for-resale products used by your employees to resale items purchased by your customers, thanks to SafeSourcelt, you will now know that all safety and quality requirements have been met.

SafeSourcelt is poised to become your invaluable business "partner," providing immeasurable benefits, such as:

- Confirmation of a firm's safety certifications, including those granted by the ISO, GFSI, USDA, FDA, along with documentation of ECO Standards.
- Reduction of exposure to potentially damaging litigation.

**Simplicity, savings, and security ... let SafeSourcing help you deliver the goods.**
